The time period for reply, if any, is set in the attached communication.

## Office Action Summary

Application No.

09/821,400

Applicant(s)

SEKI ET AL.

Examiner

Ramy M. Osman

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 23 April 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-6 and 8-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-6, 8-20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- ☐ Notice of Informal Patent Application
- ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Status of Claims*

1. This action is responsive to amendment filed on April 23, 2007, where applicant perfected the foreign priority thus establishing priority date to March 29, 2000. Claims 1-6,8-20 are pending.

### *Response to Arguments*

2. Applicant's arguments filed 4/23/2007 have been fully considered and are persuasive. Therefore the 103(a) rejection over Chang in view of Jilk is withdrawn. However, a new rejection is presented below.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 1,5,6,8-10,13-19 rejected under 35 U.S.C. 103(a) as being unpatentable over Jilk et al (US Patent No 6,993,559) in view of Igawa et al (US Patent No 6,772,193).**

5. In reference to independent claims 1,6,10,13 and 16-19, Jilk teaches a web page acquisition system, provider, method, computer readable memory and program of instructions, all respectively comprising:

a web page acquisition server and a user terminal, both of which are connected to a communication network, wherein said user terminal transmits to said web page acquisition server a web page acquisition request that includes various acquisition conditions (column 10 lines 55-67 and column 13 lines 39-42);

wherein said webpage acquisition server generates a web page acquisition list comprising non-overlapping web page acquisition requests from a plurality of user terminals (column 13 lines 40-49 & 60-65 and column 15 lines 30-40);

wherein, in accordance with said acquisition conditions included in said web page acquisition request received from said user terminal and at least one predetermined scheduling rule, said web page acquisition server acquires a web page source from a web server on said communication network and transmits said web page source to said user terminal (column 13 lines 40-55); and

Although Jilk teaches a proxy server, Jilk fails to explicitly teach the proxy server to perform wherein said web page source is formed into a library file that, in accordance with said web page acquisition request, is obtained and held in said web page acquisition server, and is transmitted to said user terminal. However, Igawa discloses a cache server that forms web data into library files to be stored in a cache library on the cache server, and then transmit the stored web data to a user terminal for the purpose of facilitating transfer of web media data to users (column 4 line 63 – column 5 line 9 and column 5 line 64 – column 6 line 10). It would have been obvious for one of ordinary skill in the art to modify Jilk wherein said web page source is formed into a library file that, in accordance with said web page acquisition request, is obtained

Art Unit: 2157

and held in said web page acquisition server, and is transmitted to said user terminal as per the teachings of Igawa for the purpose of facilitating transfer of web media data to users.

6. In reference to claim 5, Jilk in view of Igawa teach the web page acquisition service system according to claim 1,

wherein, when said web page acquisition server receives from a plurality of user terminals a plurality of web page acquisition requests for the same page, said web page acquisition server obtains and archives a corresponding web page source for said plurality of requests, and transmits said web page source to said user terminals that issued said web page acquisition requests (column 15 lines 25-45).

7. In reference to claim 9, Jilk in view of Igawa teach the provider according to claim 6, wherein said transmission control unit changes a link for said web page source held by said web page acquisition/archiving unit from an absolute link based on the URL of a web page source, into a relative link (column 14 lines 35-67).

8. In reference to claim 14, Jilk in view of Igawa teach the method according to claim 13, wherein said step for issuing said web page transmission request includes a step of: issuing, upon the receipt of a notification indicating that a web page has been acquired by said provider, said web page transmission request to said provider, regardless of the time condition that is included in said web page acquisition conditions (column 13 line 40 – column 14 line 10).

9. In reference to claim 15, Jilk in view of Igawa teach the method according to claim 13, wherein said step of receiving said web page source, is in the form of a library file (Igawa, column 4 line 63 – column 5 line 9 and column 5 line 64 – column 6 line 10).

Art Unit: 2157

10. **Claims 2-4,8,11,12,20 rejected under 35 U.S.C. 103(a) as being unpatentable over Jilk et al (US Patent No 6,993,559) in view of Igawa et al (US Patent No 6,772,193) in further view of Peterson et al (US Patent No 6,594,682).**

11. In reference to claims 2 and 11, Jilk in view of Igawa teach the web page acquisition service system and method according to claims 1 and 13:

wherein, as one of said acquisition conditions included in said web page acquisition request, a time condition for the acquisition of a web page source; and wherein, in accordance with said time condition designated in said web page acquisition request, said web page acquisition server acquires said web page source and transmits said web page source to said user terminal (column 12 lines 17-25).

Jilk fails to explicitly teach wherein said user terminal designates the time condition. However, Peterson discloses a system for scheduling the delivery of web content to a user wherein a user inputs scheduling requirements into a web content request (column 8 line 54 – column 9 line 7). It would have been obvious for one of ordinary skill in the art to modify Jilk wherein said user terminal designates the time condition for web page acquisition for the purpose of facilitating the downloading of web content to a users terminal.

12. In reference to claims 3,4 and 12, Jilk in view of Igawa teach the web page acquisition service system and method according to claims 2 and 11. Jilk fails to explicitly teach wherein said web page acquisition server performs scheduling for the acquisition of a web page source, while taking into account said time condition that is designated in said web page acquisition request and a volume of the communication traffic carried by said communication network. However, Peterson discloses scheduling data delivery based on time and traffic conditions

Art Unit: 2157

(column 9 lines 1-15). It would have been obvious for one of ordinary skill in the art to modify Jilk wherein said web page acquisition server performs scheduling for the acquisition of a web page source, while taking into account said time condition that is designated in said web page acquisition request and a volume of the communication traffic carried by said communication network as per the teachings of Peterson for the purpose of facilitating the downloading of web content to a users terminal.

13. In reference to claim 8, Jilk in view of Igawa teach the provider according to claim 6. Jilk fails to explicitly teach wherein when a limitation is placed on the size of a data file that said user terminal, which is a web page source transmission destination, can receive as a single transmission, said transmission control unit divides, into segments having an appropriate size for said user terminal, said web page source that is held in said web page acquisition/archiving unit, and forms said segments into library files. However, this is disclosed by Peterson (column 9 lines 1-15 and column 12 lines 33-60). See above mentioned motivation.

14. In reference to claim 20, Jilk teaches the web page acquisition service according to claim 1. Jilk fails to explicitly teach wherein, said at least one predetermined scheduling rule comprises the acquisition of a web page source occurring during a time period during which a volume of communication is small. However, Peterson discloses scheduling data delivery based on time and periods of low traffic conditions (column 9 lines 1-15). See above motivation.

### ***Conclusion***

15. Applicant is advised that the above specified citations of the relied upon prior art are only representative of the teachings of the prior art, and that any other supportive sections within the

Art Unit: 2157

entirety of the reference (including any figures, incorporation by references, and claims) is implied as being applied to teach the scope of the claims.

16. Applicant's amendment filed on 8/18/2006 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramy M. Osman whose telephone number is (571) 272-4008. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2157.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
